Summary

Software Developer with 1 year of professional experience in developing and maintaining enterprise web applications using C#, .NET Framework, AngularJS, JavaScript, HTML, CSS, and SQL Server. Experienced in implementing business requirements, developing and modifying REST APIs, writing SQL queries and stored procedures, debugging application issues, and performing unit testing. Strong foundation in full-stack development, database operations, and application enhancement.

Skills

Frontend: HTML, CSS, Bootstrap, JavaScript, AngularJS

Backend: C#, .NET Framework, ASP.NET MVC, REST APIs

Database: SQL Server, SQL Queries, Stored Procedures, JSON

Tools: Visual Studio 2019, Git, Bitbucket, Postman, VS Code

Libraries / Frameworks: Entity Framework

Professional Experience

ELPIS SYSTEMS INDIA PVT LTD | Software Engineer

- Developed and maintained enterprise web application functionality using C#, .NET Framework, AngularJS, JavaScript, HTML, CSS, and SQL Server.
- Worked on an insurance claims application and implemented new features and enhancements based on business requirements and user stories.
- Developed and modified SQL Server stored procedures, queries, tables, and database logic to support application requirements.
- Implemented frontend functionality using AngularJS and integrated frontend components with backend APIs.
- Worked on payment-related functionality including Draft Payment creation, update, approval, rejection, and validation workflows.
- Worked on claims litigation functionality including NF and AAA tracker requirements, grouping, filtering, and display logic.
- Performed debugging, issue analysis, defect fixing, unit testing, and validation of application changes.
- Worked with JSON data handling, API responses, database operations, and application-level business validations.
- Used Git and Bitbucket for source control and collaborated with team members during development and defect resolution.

Project

Insurance Claims Application

.NET Framework, C#, AngularJS, SQL Server

- Worked on an enterprise insurance claims application supporting claims, payments, litigation, and related business processes.
- Implemented Draft Payment functionality for adjusters, including draft creation, update, approval, rejection, and status handling.
- Worked on NF Suit & AAA Tracker functionality to display and manage No-Fault and Arbitration records based on business requirements.
- Developed and updated SQL Server stored procedures and database logic for retrieving and processing claim-related information.
- Implemented UI validations, dropdown handling, filtering, grouping, and asynchronous API interactions using AngularJS.
- Investigated and fixed application defects and performed unit testing for newly developed functionality.

Achievements

- **Employee of the Month – June 2026:** Recognized for contributions to project development, delivery of assigned requirements, application issue resolution, and supporting the team in meeting project objectives.

Education

Bachelor of Engineering

Bannari Amman Institute of Technology, Sathyamangalam

Graduated: 2024 | CGPA: 7.61 / 10
