

VISHNU KARTHICK K

Software Engineer

Bangalore, India | +91-8838009677 | vkarthick459@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Summary

Software Developer with 1 year of professional experience in developing and maintaining enterprise web applications using C#, .NET Framework, AngularJS, JavaScript, HTML, CSS, and SQL Server. Experienced in implementing business requirements, developing and modifying REST APIs, writing SQL queries and stored procedures, debugging application issues, and performing unit testing. Strong foundation in full-stack development, database operations, and application enhancement.

Skills

Frontend: HTML, CSS, Bootstrap, JavaScript, AngularJS

Backend: C#, .NET Framework, ASP.NET MVC, REST APIs

Database: SQL Server, SQL Queries, Stored Procedures, JSON

Tools: Visual Studio 2019, Git, Bitbucket, Jira, Postman, VS Code

Libraries / Frameworks: Entity Framework

Professional Experience

ELPIS SYSTEMS INDIA PVT LTD | Software Engineer

Bangalore, India

- Develop and maintain enterprise web applications using C#, .NET Framework, AngularJS, JavaScript, HTML, CSS, and SQL Server.
- Implement application enhancements and business requirements based on user stories functional specifications.
- Develop and modify REST APIs and integrate frontend components with backend services using AngularJS.
- Design and modify SQL Server stored procedures, queries, tables, and database logic to support application.
- Implement client-side validations, data binding, filtering, grouping, and asynchronous operations using AngularJS.
- Analyze application issues, debug code, identify root causes, and implement appropriate fixes.
- Perform unit testing and validate application changes before handing them over for QA testing.
- Work with JSON data, API responses, database operations, and application-level business validations.
- Use Git and Bitbucket for source control and collaborate with team members throughout the development life-cycle.

Project

Insurance Claims Application

.NET Framework, C#, AngularJS, SQL Server

- Enterprise web-based insurance claims application used to manage claim information and support various claim-related business processes.
- Contributed to the development of payment processing workflows, including creating, updating, validating, and managing payment-related records.
- Implemented claims litigation-related functionality to manage and display records based on business requirements and defined business rules.
- Developed functionality for combining, grouping, filtering, and displaying claim-related records based on provider, claim information, and date criteria.
- Developed a configuration-driven dynamic UI where form fields are generated based on database configurations, including input type, placeholder, required status, and validation properties.
- Created and enhanced SQL Server stored procedures to retrieve, insert, update, and process claim-related data.
- Integrated frontend screens with backend REST APIs and implemented data handling between AngularJS and .NET services.
- Resolved functional issues and implemented enhancements based on QA feedback and changing business requirements.

Achievements

- **Employee of the Month – June 2026:** Recognized for contributions to project development, delivery of assigned requirements, application issue resolution, and supporting the team in meeting project objectives.

Education

Bachelor of Engineering

Bannari Amman Institute of Technology, Sathyamangalam

Graduated: 2024 | CGPA: 7.61 / 10
